Total		49

* Approved by the University of the East Board of Trustees on May 21, 2015.

** CHED Acknowledgement Receipt, SY 2015-2016.

*** All students are required to present their papers, 1 in national and 1 in international conferences.

CORE

GIT 8101 Seminar in IT for Society and Culture

The course examines IT as major development in science in the context of social, cultural, political, legal, and ethical forces. (3 units)

GIT 8102 Seminar in IT: Paradigm Shifts, Organization and Leadership

The course tackles current topics, e.g. applications to business and organizations with strong IT human resource demands, implications of paradigm shifts translated to new key leaderships, responses to challenges and sustainability of innovations. (3 units)

GIT 8103 Advanced Statistical Methods

This course focuses on advances in the field of statistics, especially those that require the use of computers to perform complex and tedious computations. Models in data analytics will also be discussed, with emphasis on their algorithmic components. A statistical package will be used to analyze current implementation of these algorithms. (3 units)

GIT 8104 Advanced Quantitative Techniques

This course covers advanced topics in discrete mathematics, linear algebra, numerical analysis, and stochastic processes as they are applied to IT. (3 units)

GIT 8105 Seminar in Research Methods in IT

This seminar focuses on the broad research designs and methodologies in IT research. (3 units)

MAJOR

GIT 8201 Advanced Systems and Software Engineering

This course, essentially a practicum subject, provides the students with ample opportunities to do hands-on training and enhance skills in software development. (3 units)

GIT 8202 Advanced Database Management Systems

This course examines database system architecture, system catalog, query processing and optimization, transaction processing concepts, concurrency control techniques, database recovery techniques, database security and authorization, object-oriented and object-relational databases, distributed databases and client-server architecture, data warehousing and data mining, and emerging technologies and applications. (3 units)

GIT 8203 Advanced Human-Computer Studies

This course covers research and analytical methods for evaluating the impact of IT systems on humans and organizations. Students will use different technical and non-technical tools to conduct practical evaluation of systems for improving system functionality & usability. (3 units)

GIT 8204 Advanced Electronic Commerce (E-Commerce)

This course provides a comprehensive view of the social, cultural, organizational, and cognitive impacts of e-commerce technologies. (3 units)

GIT 8205 Seminar in IT and Network Security

The course involves investigation and detailed study of computer security principles, mechanisms and implementations to ensure data protection and security of computers systems. (3 units)

GIT 8206 Seminar in Emerging Technologies

This course provides the opportunity for DIT students to identify and evaluate IT-related emerging technologies and their applicability to information systems, business & society. (3 units)

GIT 8207 Special Topics in Information Technology

This course responds to the fast changing landscape of IT that demands visiting professors and/or adjunct faculty, upon invitation, to teach highly specialized topics not covered in any of the existing courses. (3 units)

GRR 8602 International Collaborative Research

Research collaboration between the student and professor in the field based in a partner institution overseas (3 units)

Any 800 Level Courses in Business Administration, Education and Allied Disciplines (3 units)

GRR 8605 Across-Discipline Research Colloquium

This course entails attendance and participation in fora during research presentations delivered by invited doctoral students before or after their oral defense, likewise, by guest presenters/researchers from the University and other academic communities (1 unit)

GRR 8700 Comprehensive Examination

After completion of all academic courses (0 unit)

GRR 8980 Dissertation 1

Selection and research topic presentation; writing and oral defense of research proposal (6 units; Prerequisite: GRR 8700 Comprehensive Examinations)

GRR 8990 Dissertation 2

Data gathering, writing, and final oral defense of doctoral dissertation as proposed in Dissertation 1 (6 units; Prerequisite: GRR 8980 Dissertation 1)
